

SAT SUITE OF ASSESSMENTS

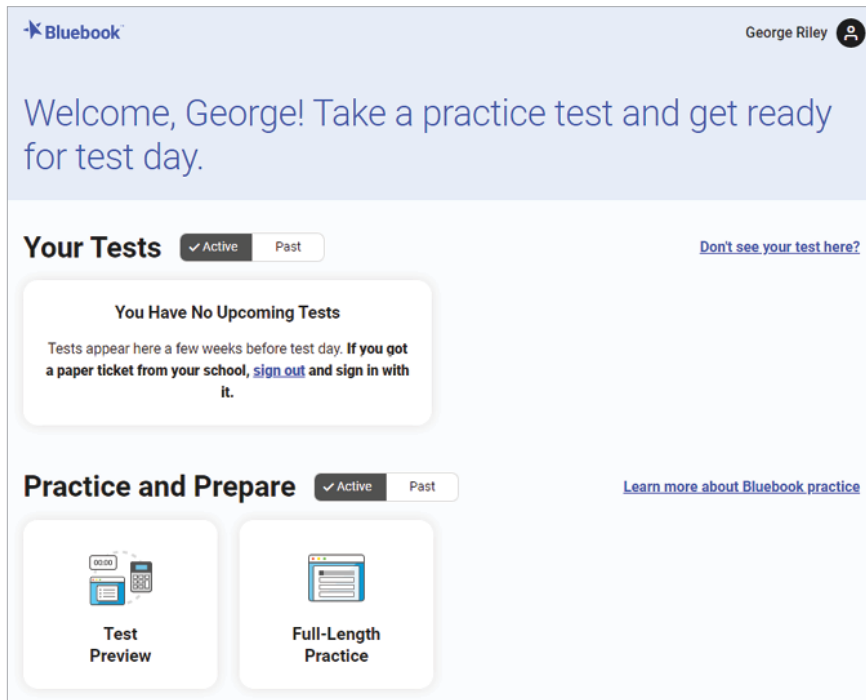

Practice Quick Start Guide

Practice for the SAT or PSAT-Related Assessments in 10 Simple Steps

1. Your school will download Bluebook™ onto your testing device. Get access to full-length practice tests from College Board, the makers of the SAT®, with the sign-in credentials your school will give you. You can also download Bluebook on a personal device at home.

2. On the Bluebook homepage, navigate to **Full-Length Practice** under Practice and Prepare. You can also select **Test Preview** to get a peek at the app’s built-in tools and familiarize yourself for test day. Resume a practice test you’ve already started from here.

A screenshot of the Bluebook homepage for a user named George Riley. The header includes the Bluebook logo and the user's name. A welcome message says "Welcome, George! Take a practice test and get ready for test day." Below this, there are two main sections: "Your Tests" and "Practice and Prepare". The "Your Tests" section has tabs for "Active" and "Past", and a message stating "You Have No Upcoming Tests" with instructions on how to see tests. The "Practice and Prepare" section also has "Active" and "Past" tabs, and a link to "Learn more about Bluebook practice". Under this section, there are two buttons: "Test Preview" and "Full-Length Practice".

Bluebook George Riley

Welcome, George! Take a practice test and get ready for test day.

3. Select your **Test Type** and **Practice Test** from the dropdown menus available. If you plan on testing with accommodations, select the switch next to “I will be testing with accommodations” to apply them to your practice test.

A screenshot of the "Choose a Full-Length Practice" form. It contains three fields: "Test Type *" with a dropdown menu showing "SAT", "Practice Test *" with a dropdown menu showing "Select", and "Accommodations" with a toggle switch labeled "I will be testing with accommodations". A legend indicates that "*" means "Required".

[Why don't I see my accommodation listed here?](#)

If you require paper-based accommodations or printed braille, talk to your Services for Students with Disabilities (SSD) coordinator. Nonadaptive paper tests are available to print on our website at satsuite.collegeboard.org/practice/practice-tests/paper. You can also go to accommodations.collegeboard.org for more details.

IMPORTANT: While anyone is welcome to use our accommodated practice tests, using these practice materials does not mean you have been approved to test with a particular accommodation.

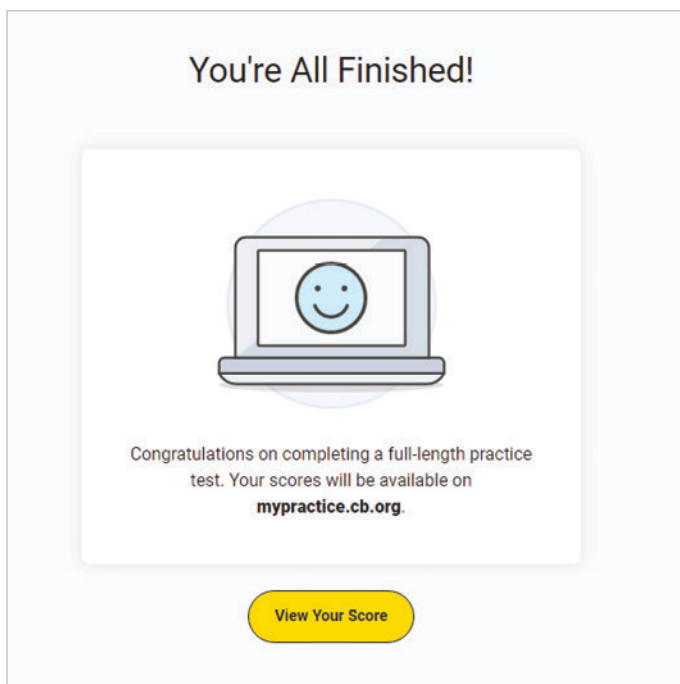

4. Follow the onscreen instructions as indicated below, then start practicing! We recommend taking at least 1 practice test with the timer and allowing for breaks as you would on test day. However, you can practice your way, pause as needed, and, when you're ready to resume practice, pick up right where you left off.

5. During the practice test, use the Bluebook built-in tools previously mentioned in step 2. You'll find **Mark for Review** and **Option Eliminator** on the questions themselves. The rest of the tools can be found in the top right corner. Depending on what section you're taking, you'll see icons for a **Built-In Calculator** and **Reference Sheets**, a **Highlights & Notes** tool, and more.

The screenshot shows a digital test interface. At the top, a timer displays '3:15'. In the top right corner, there are icons for 'Calculator', 'Reference', and 'More'. The question area is titled '3 Mark for Review' and contains the text: 'What is the area of a rectangle with a length of 17 centimeters (cm) and a width of 7 cm?'. Below the question are four multiple-choice options, each with a radio button and an 'Undo' link:
A 24 cm^2
B 46 cm^2
C 119 cm^2 (This option is selected, indicated by a filled radio button)
D 576 cm^2

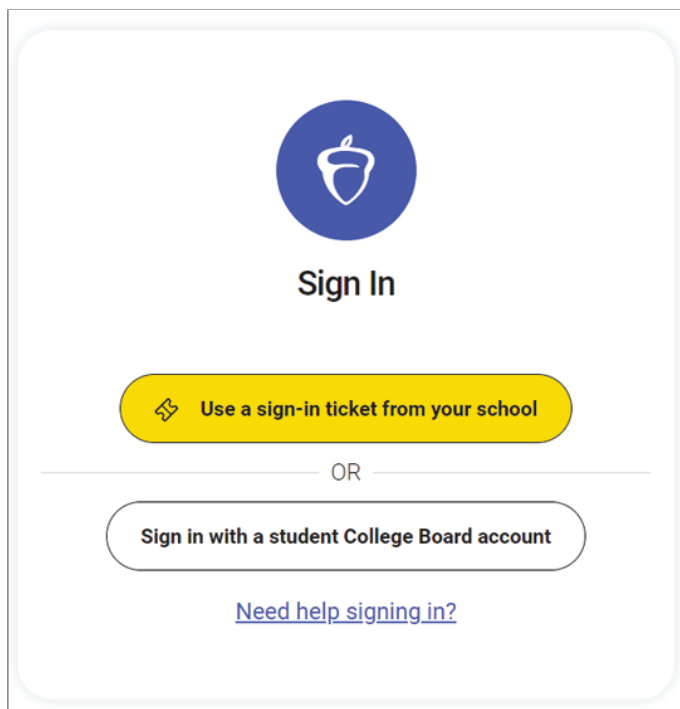

6. After you complete the practice test, click **View Your Score**.

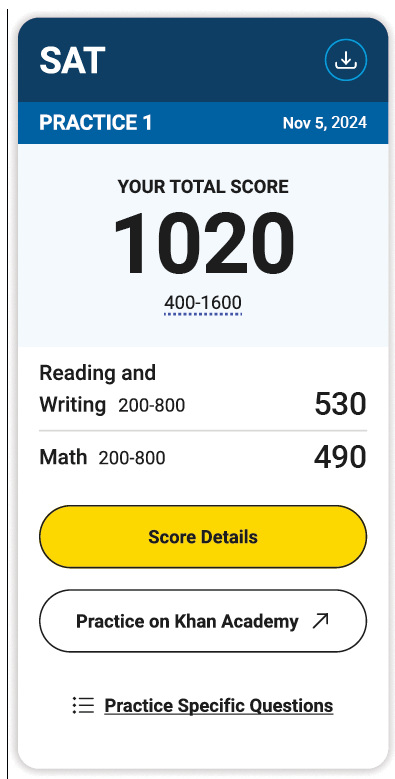

Tip

All students taking the SAT and PSAT™-related assessments can now toggle between scientific and graphing options in the embedded Desmos calculator. Students can switch options at any point during the Math section.

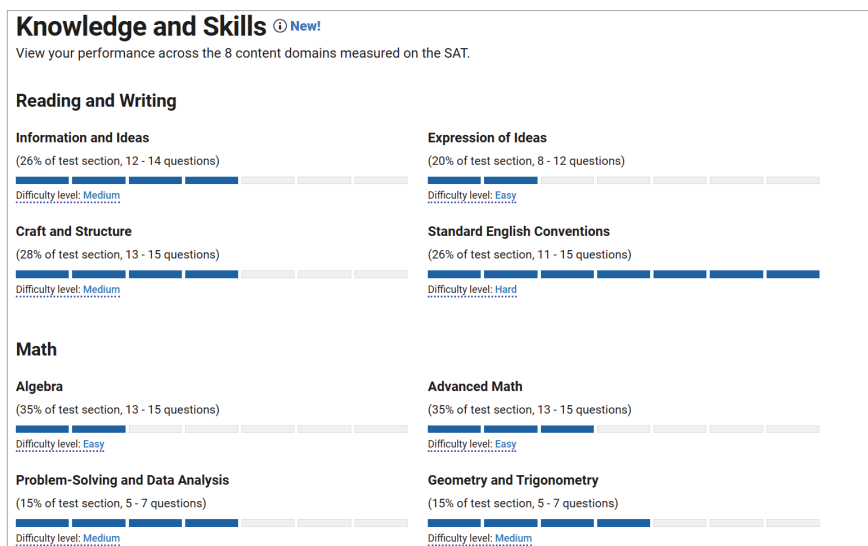

7. Use the same sign-in credentials you used for Bluebook to sign in to **My Practice** and retrieve your scores.

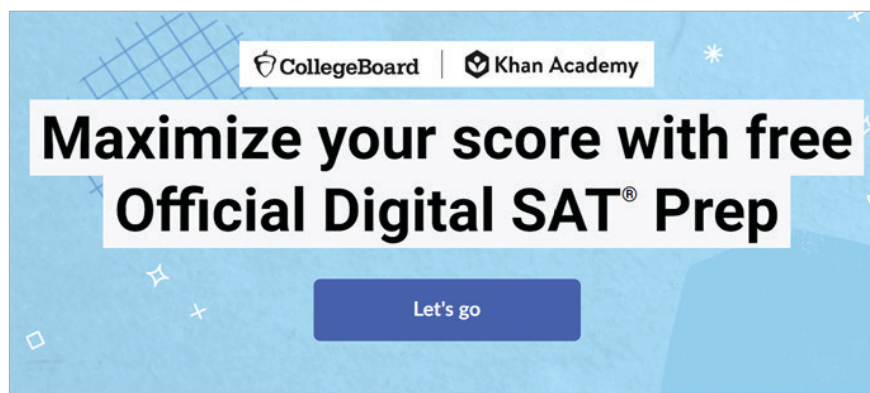

8. Once on My Practice, review your scores. Then, select **Score Details**.

9. On the Score Details page, you'll see information on how you performed on each of the Knowledge and Skills Domains measured on the test by difficulty level. To get the most out of your practice tests, review your answers, the correct answers, and explanations under Actions. You can also view a set of **Practice Specific Questions**, which My Practice will generate for you based on the results of your practice test to provide additional review in the areas where you have the greatest opportunities for improvement.

10. By clicking the **Practice on Khan Academy** button on your scorecard or Score Details page, you can go to Khan Academy® directly from My Practice and take advantage of free Official SAT Prep that includes thousands of practice questions, videos, lessons, and hints to help you build the skills needed.

For more tips on how to make the most of your practice, visit satsuite.collegeboard.org/practice.
